

Preparation Check-list

FLEAS

Flea Treatment

TruTech will be treating your residence so as to control Fleas.

The technician will require you to prepare your suite as follows:

- Cats and Dogs should be treated with a veterinarian flea treatment eg: "Advantage"
- Clear all, or as many, items from the floor area in all the rooms. Do not worry about furniture
- Any excess clutter, toys, books, clothes, etc. should be taken off the floor; put them on top of a bed or something alike
- Before we began the treatment, all occupants, including pets, must leave the unit and not re-enter for a minimum of 6 hours after our technician arrives
- Move all furniture away from the walls by at least 6 inches
- Vacuum all floors the night before we come and dispose

You may leave aquariums, but make sure you turn off the filtrations and aeration systems and cover the tank with a sheet or cloth; please leave the cover over the tank for an extra 2 hours when you get back.

Anyone who is more prone to allergies has asthma or children under 2 years of age should also leave the building for an extra 6 hours for a total of 12 hrs.

When you re-enter your suite you may put the items you have moved back to where they were. Please do not wipe or mop the floors or cupboard areas that we have treated for at least 3 weeks. You may vacuum but do not use a wet towel or mop.

You may open doors and windows when you first come home to air out your home.
